PREFACE

In this book an attempt is made to state in terms of behavior the facts and principles of general psychology. Although the field it covers is somewhat more extended than that of most text-books in psychology, the authors have sought to make the book compact as well as systematic. For efficiency of teaching much traditional but unnecessary detail has been omitted. Only such facts of physiology as have important significance in an introductory course are included. Many blind-alley topics, an acquaintance with which has been considered a polite accomplishment in psychology, have been deliberately disregarded. The facts set forth are those which lead the student to a systematic explanation of his own conduct and that of his fellows. The purpose of the book is to describe man's original nature, the way in which this nature is altered by use, and the common modes of individual and social behavior that result.

E. R. G.

CONTENTS

	PAGE
PREFACE	v
CHAPTER	
I. THE ELEMENTS OF BEHAVIOR	1
Behavior Dependent on Bodily Structure	3
Classes of Sense Organs	6
The Exteroceptors	7
The Interoceptors	20
The Proprioceptors	21
The Nervous System	23
Regulatory Character of Responses	28
Delayed Utility of Responses	31
Apparent Absence of Utility of Some Responses	32
Orientation, Locomotion, and Intervention	33
Internal Responses	36
The Action of a Stimulus-Response Mechanism	39
Weber's Law	42
The Interaction of Stimulus-Response Mechanisms	43
Compromise Responses	46
II. INSTINCT	48
Reflexes	49
Instincts Are Chain Reflexes	54
Precurrent and Consummatory Responses	60
The Effect of Varying Situations upon Precurrent Responses	67
Individual Differences	70
III. LEARNING	75
Positive Adaptation	76
Negative Adaptation	80
Transitory Changes of Threshold during a Single Practice Period	85
Initial Torpor and Fatigue	85
The Conditioned Response	88
Conditioned Emotional Responses	91
The Substitution of Similar Stimuli	94
Facilitating Effect of Conditioning Stimuli	95

CHAPTER	PAGE
The Neural Basis of Learning	97
Associative Inhibition	99
The Serial Response	100
The Effects of Practice on the Serial Response	105
Forgetting	109
Whole and Part Learning	113
Results of the Distribution of Practice	115
Learning Meaningful Material	116
Trial and Error	117
The Shortening of a Trial and Error Series into a Final Habit Response	119
Imitation	130
 IV. CENOTROPES	 134
Common Habits	138
Both Instincts and Cœnotropes Are Common Modes of Behavior	145
Play	148
Other Examples of Common Modes of Behavior	153
 V. PERCEPTION	 158
Perception and Speech	162
At Different Times a Situation May Prompt Us to Different Perceptions	166
Compromise Responses in Perception	170
Perceptions from Simultaneous Stimuli	171
Space Perception	172
Visual Space Perception	173
Visual Perception of Objects	178
Auditory Space Perception	180
Auditory Perception of Objects	181
Olfactory Perception	183
Kinæsthetic and Static Perception	186
Touch Perception	186
Time Perception	187
Judgment	190
Conviction and Belief	195
 VI. HUMAN MOTIVES	 198
The Delayed Reaction	198
The Wish	203
Attention	204
Volition	205
Intention	209
Drive	210
