SECOND  
REPORT OF PROGRESS.

E. T. DUMBLE,  
STATE GEOLOGIST.

1891.

AUSTIN:  
HENRY HUTCHINGS, STATE PRINTER.  
1892.

OFFICE OF COMMISSIONER OF INSURANCE, STATISTICS AND HISTORY,  
AUSTIN, TEXAS, February 24, 1892.

Hon. James S. Hogg, Governor, Austin, Texas:

DEAR SIR—I have the honor to transmit herewith a brief statement from Prof. Dumble, State Geologist, showing the principal results of the work in Texas of the Geological Survey for the year 1891.

Your attention is kindly directed to the remarks made by Prof. Dumble under the head of "Water Supply," and especially to the suggestions made with a view of securing a constant supply of water for the Trans-Pecos country.

It is gratifying to note the kind aid tendered by the United States Geological Survey through Major Powell, the Director, in the development of that valuable section of our State.

It affords me pleasure to state just here that the United States Geological Survey has manifested a desire at all times to co-operate with the Texas Survey to the fullest extent, which I assure you is not underestimated by this Survey and is highly appreciated by this Department.

Very truly yours,

(Signed)

JOHN E. HOLLINGSWORTH,  
Commissioner.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial data. This includes not only sales and purchases but also expenses and income.

The second part of the document provides a detailed breakdown of the company's financial performance over the last quarter. It includes a comparison of actual results against budgeted figures, highlighting areas of both strength and weakness. The analysis shows that while sales have exceeded expectations, operating expenses have also increased significantly.

The third part of the document outlines the company's strategic goals for the upcoming year. It focuses on improving operational efficiency, reducing costs, and expanding market reach. Key initiatives include investing in new technology, streamlining processes, and exploring new market opportunities.

The fourth part of the document discusses the company's commitment to ethical business practices and social responsibility. It details the various programs and initiatives in place to support the community, promote environmental sustainability, and ensure fair treatment of all employees.

The fifth and final part of the document provides a summary of the key findings and recommendations. It reiterates the importance of transparency, accountability, and continuous improvement. The document concludes with a strong statement of confidence in the company's future prospects and a call to action for all employees to contribute to the company's success.

DEPARTMENT OF AGRICULTURE, INSURANCE, STATISTICS AND HISTORY.  
GEOLOGICAL SURVEY OF TEXAS,  
AUSTIN, TEXAS, February 20, 1892.

Hon. Jno. E. Hollingsworth, Commissioner of Agriculture, Insurance, Statistics,  
and History:

DEAR SIR—I have the honor to transmit herewith a report of progress  
of the work of the Geological Survey of Texas for the year ending  
December 31st, 1891.

I desire also to express my thanks for the ready assistance you have  
at all times afforded me during the progress of the work.

Yours very truly,  
E. T. DUMBLE,  
State Geologist.
