PREFACE TO THE SECOND EDITION.

THE favourable reception accorded to this little book has exhausted the first edition at an early period; and advantage has been taken of the reprinting to revise the whole of the text and to introduce new matter in several places.

69, WIMPOLE STREET,
May, 1880.

PREFACE TO THE FIRST EDITION.

A LARGE portion of the time of every ophthalmic consultant is occupied, day after day, in repeating to successive patients precepts and injunctions which ought to be universally known and understood. The following pages contain an endeavour to make these precepts and injunctions, and the reasons for them, plainly intelligible to those who are most concerned in their observance.

It is proper to mention that some of the diagrams in the second and third chapters have been taken, with slight alterations, from Mackenzie's *Physiology of Vision*; and also that I have derived valuable suggestions from *Die Pflege der Augen* of Professor Arlt.

69, WIMPOLE STREET,
December, 1879.
