## PREFACE

WRITING these reminiscences of his life's work was one of the pleasures of Dr. Williamson's later years. I have thought it better to give them to his readers without alteration, and have done nothing more than put his disconnected sketches into something like order, add a few footnotes, and the last pages.

For kind supervision of the chapter on Palaeobotany I am indebted to Dr. D. H. Scott.

I have compiled the list of writings from the "Catalogue of Scientific Works" published by the Royal Society (a proof of the last edition of which—now in the press—was kindly sent me by the Secretary), and from works in my own possession.
