PREFACE.

This compilation of the Mechanics' Lien Law of the State of California is designed, not only for the benefit and convenience of the legal profession of the State, but also for the use of contractors, builders, members of Trades Unions, and all others who are interested directly or indirectly in the rights which the law has secured to labor. The statutory provisions regulating such liens are given in full, supplemented by brief statements of decided points, giving construction to those provisions. And it is believed that this connected view of the law, provided in a cheap and convenient form, will prove eminently acceptable to those for whose use the compilation is designed.

San Francisco, February 5th, 1894.
