AUTHOR'S PREFACE.

THIS book is written with the hope of fulfilling the various needs of the potato growers of California. Many suggestions will also prove beneficial to the eastern grower. Since the potato is the foremost food plant of the American people, the author has endeavored to give in as brief and complete form as possible the much-needed and valuable information. Since the author has made a life study of this problematical plant, there are some profitable suggestions unfolded to the reader within these few pages. Such knowledge is the author's personal experience, having learned from this, the world's greatest teacher.

The book contains some interesting experiments on the plant as well as the practical culture of the potato.

A thorough study and strict observance of the instructions herein will insure the most amateurish growers of California remarkable success.

July, 1917.

A. J. YOUNG, SR.
