Praefatio.

Quae annorum sex spatio scientiam nostram auxerunt novae observationes et species nuperius detectae, quantum fieri poterat exacte et complete in hoc Monographiae supplemento collegi, Tibique, Lector benevole! in ordinem systematicum redactas propono.

Longe maximam specierum novarum partem ipse descripsi, non solum ex amicissimi H. Cuming Musco, sed etiam ex aliorum Virorum communicatis, inter quae primum locum obtinent numerosae species in variis insulae Cubae regionibus ab amico Gundlach collectae, quarum ope errores nonnullos, praesertim species Orbignyanae spectantes, corrigere licuit. Quas non ipse vidi species novas, ab Auctoribus descriptas, exactis Auctorum verbis suis locis inserui.

Necessarium fuit, completam specierum seriem iterum enumerari, quia ad fere quamlibet citationes Auctorum recentiorum vel iconum addendae erant.

Nihilominus jam hoc ipso momento enumeratio incompleta est, quia, dum haec scripsi, egregiae species novae, in provinciis orientalibus insulae Cubae a Cl. Gundlach detectae, mihi pervenerunt, cum reliquis Deo favente in Supplemento secundo colligendae!

Cassellis mense Junio 1858.

Dr. L. Pfeiffer.
