## PREFACE TO THE FOURTH EDITION.

---

That this book has not been written in vain, appears to be evidenced by the facts, that three large editions have been sold in this country and in America, that it has been translated into the French, Italian, Spanish and Russian languages, and that a fourth edition is now demanded, the third having long been exhausted. An endeavor has been made to remove obscurities, correct errors, and revise generally, without much enlarging the work. An index is added, which it is hoped will facilitate reference.
