PREFACE

THE following essays appeared originally in the *Transactions of the Students' Society of the National Dental Hospital*, the *Dental Record*, and the *British Dental Journal*. Although separately they have gained a certain currency both at home and abroad, having been criticised, reproduced, translated, and abstracted in several other journals, yet, I think, they may now be advantageously published together, in the hope that they may prove a more or less fitting supplement to my book on the Cause and Prevention of Decay in Teeth.
