'The Cricket Tutor supplies a want much felt by schools and players who live in a retired part of the country, where they are not able to procure the advice of any professional, the price being within the range of every pocket. The instructions laid down in this manual may be relied upon as of a first-class character, written as they are by the author of the *Cricketer's Field*, the standard book on the subject. The Tutor is full of plain and practical directions on all matters concerning the game, which, followed to the letter, would insure a man's becoming an excellent cricketer.'

JOHN BULL.

'Two's boys who appreciate the solemn importance of cricket cannot do better than lay to heart the precepts of the author of the *Cricketer's Field* contained in the *Cricketer's Tutor*. We can promise they will find it very light and pleasant reading, and there is a useful moral in many of its maxims. . . . The Tutor does not deal with the rules of the game, or those elementary matters which every boy may be expected to know. Its object is to inculcate those who play cricket to do their work well and in an artistic manner; and to this end the rules gathered from common-sense and experience are brought together with the hand of a master.'
