FOREWORD

ON DECEMBER 21, 1942, the Board of Governors of the Commonwealth Club of California authorized a research study to be made on the population of California.

Mr. Davis McEntire was appointed Director in charge of the study. He and his associates began their work on July 1, 1943. The final report of Mr. McEntire, together with the materials gathered, was filed with the Club's Research Advisory Council on October 19, 1945.

Accepting the recommendations of the Research Advisory Council, as made on November 9, 1945, the Board of Governors on November 19, 1945, authorized the publication of Part I of the study, believing the facts therein set forth to be of value and of timely importance in connection with questions now before the people of California.

As a basis for its research publications, the Commonwealth Club of California selects for study timely subjects of importance to the people of California. These publications, of which this is one, do not constitute an expression of the position or opinion of the Commonwealth Club of California. They are issued on their intrinsic value.
