BY

CHARLES GARDINER GUTHRIE,

ASSISTANT SURGEON TO THE ROYAL WESTMINSTER OPHTHALMIC HOSPITAL.

LONDON:

JOHN CHURCHILL, PRINCES STREET, SOHO;

W. R. SAMS, ROYAL LIBRARY, ST. JAMES'S STREET;

JOHN MITCHELL, OLD BOND STREET.

1845.

PRICE FOUR SHILLINGS.

P R E F A C E .

THE following observations contain the substance of that part of the Lectures on Surgery which have been for years delivered by Mr. Guthrie to the Medical Officers of the Public Service, and to the Students of the Westminster and the Royal Westminster Ophthalmic Hospitals; as well as of those Clinical Lectures given by me at the Hospital during the last winter, which relate to the treatment of Cataract. I have endeavoured to be explicit in enumerating the symptoms and appearances of each kind, and in the directions explanatory of the different operations most appropriate for them; with the hope that they cannot be mistaken by professional readers, whilst they are as far as possible divested of unnecessary technicalities, that they may be readily understood by every intelligent person desirous of becoming acquainted with this interesting subject.

CHARLES GARDINER GUTHRIE.

19, Savile Row,
May 20, 1845.

CONTENTS.

	PAGE
GENERAL OBSERVATIONS	1
Cataracts divided into true and false	2
Ripe or unripe	3
Constitutional, or local, or accidental	4
Affect persons of all ages	4
Appear to be hereditary	4
Constitutional or idiopathic cataract attacks both eyes	5
Accidental or traumatic cataract usually only the eye injured	5
 ON THE SYMPTOMS OF THE VARIOUS KINDS OF CATARACT	 6
Internal symptoms, as observed by the sufferer	6
External symptoms, as seen by the surgeon	8
Progress of the disease	9
Appearance, motions, and sympathies of the iris	10
Immobility of the iris	14
Cataracts of various colours	17
Muscae volitantes, symptoms of	18
Discrimination of	20
Remarks of Capt. Kater upon	22
 ON THE DISCRIMINATION BETWEEN INCIPIENT AND CONFIRMED AMAUROSIS AND CATARACT	 24
Internal symptoms	25
External symptoms	25
Catoptrical test	26
 ON THE DISCRIMINATION OR DIAGNOSIS BETWEEN GLAUCOMA AND CATARACT	 27
Glaucoma, origin of, symptoms of	27
Glaucoma cannot be mistaken	28
 THE CAUSES OF CATARACT.—IDIOPATHIC OR CONSTITUTIONAL	 30
Age	30
Inflammation	30
Congenital	32
Traumatic	32

	PAGE
ON THE CLASSIFICATION OF CATARACT	32
True, false, and complicated	33
ON THE DISCRIMINATION OF TRUE CATARACT	33
Lenticular cataract.. .. .	33
Capsular cataract	33
Capsulo-lenticular cataract	33
Of which there are several species	33
ON THE DISCRIMINATION OF LENTICULAR OR HARD CATARACT	33
Inquiries	34
Application of belladonna	34
Colour of cataracts	35
Central opacity	35
Circular opacity	36
White cataract	37
ON THE DISCRIMINATION OF CAPSULAR CATARACT	37
Anterior part	37
Posterior part	38
———— opacity of, a rare disease	39
Mistaken for opacity of the lens	39
Secondary capsular cataract	40
ON THE DISCRIMINATION OF CAPSULO-LENTICULAR CATARACT	40
Three Varieties :—	
Fluid, soft or caseous, and siliquose	40
Fluid cataract of three kinds :—	
The common fluid, the Morgagnian, the hydatid or	
encystid	40
Fluid cataract, signs of	40
Morgagnian cataract	41
Hydatid or encystid cataract	42
Soft, gelatinous, or flocculent cataract	42
Marmoraceous cataract	42

	PAGE
ON THE DISCRIMINATION OF CAPSULO-LENTICULAR CATARACT— <i>continued</i> .	
Fenestrated, stellated, pointed, central, half, and quarter cataracts	43
Siliquose cataract	43
Gypsum cataract	45
ON THE DIAGNOSIS OF CATARACTS OF THE SECOND CLASS, OR FALSE OR SPURIOUS CATARACTS	46
Adherent or concrete cataract	47
Lymphatic or purulent cataract	47
Grunous or sanguineous cataract	47
Barred cataract	48
Putrid cataract	48
Arborescent, dendritic, or choroidal cataract	48
Cartilaginous and stony cataracts	49
Complicated cataract	49
ON THE CURE OR REMOVAL OF CATARACT WITHOUT OPERATION ..	50
Sometimes although rarely relievable	51
By loss of the other eye.. .. .	51
By operation on the other eye	52
Reproduction of the lens, case of.. .. .	53
Glasses required to compensate for loss of lens.. .. .	53
ON THE PROPER PERIOD FOR OPERATING	54
From April to October	54
Age of no importance	54
Preparation	55
Pregnancy	57
When one eye only is affected *	57
On the propriety of operating on both eyes at the same time .	58
ON THE OPERATION FOR THE EXTRACTION OF A CATARACT	59
The <i>ne plus ultra</i> of operating	59
Shape of the knife	60
Form of the hook	61
Incision should be made upwards.. .. .	62

	PAGE
ON THE OPERATION FOR THE EXTRACTION OF A CATARACT—continued.	
Position of the patient	62
— Surgeon, right eye	63
— left eye	64
Manner of fixing the eye	64
Sensibility of the eye when the upper eyelid is raised	64
The common opinion on this point erroneous	65
The extreme sensibility of the eye rendered null by the raising of the lid	66
Application of the knife	67
Place of entering it of importance	68
Manner of entering it	68
Difficulties in proceeding	69
Completion of the incision	70
Escape of the aqueous humour	71
Punctuation completed	72
Falling forward of the iris	72
Means of prevention	73
Injury of the iris	73
Extent of the incision in the cornea	74
Introduction of the hook and curette	74
Deficiency of the incision, or of the rupture of the capsule ..	76
Rising of the vitreous humour and sinking of the lens	77
Loss of part of the vitreous humour and consequent irregu- larity of the pupil	78
Apposition of the cut edges	79
Appearance after the operation is concluded and the applica- tion of the bandage	80
Treatment after the operation	81
Separation of the edges of the incision	84
Hæmorrhage	85
Inflammation in excess	85
— from debility	86
Proper spectacles after recovery	87
ON THE OPERATION FOR CATARACT BY DEPRESSION OR DISPLACEMENT	
Depression by Beer's method	87
Operation condemned	90
Depression by Scarpa's method	90
Reclination of the German school not recommended	92

	PAGE
ON THE OPERATION FOR CATARACT BY DEPRESSION OR DISPLACEMENT	
<i>—continued.</i>	
Bowen's method	92
Langenbeck's method	93
New operations suggested by drawing the lens downwards ..	95
————— by transfixing it, and placing the posterior surface upwards	96
Displacement by the author's method	97
Attendant accidents and difficulties	99
Vomiting a distressing symptom	100
Acute inflammation	100
Chronic inflammation	101
Case of lens removed successfully	102
ON THE COMPOUND OPERATION BY DISPLACEMENT AND EXTRACTION	103
Operation described	104
ON THE OPERATION FOR SOFT CATARACT	105
Of two kinds—Keratonyxis, Hyalonyxis	105
ON THE KERATONYXIS	106
ON THE HYALONYXIS	107
May be preceded by the former	107
Shape of the needle	107
Manner of operating	108
Division of the lens	109
Difficulties	110
Eye unsound	111
When the lens is very soft or gelatinous	111
Adherent cataract on one side only	113
Operations to be performed	113
Operation by solution and extraction	113
ON THE OPERATION FOR CONGENITAL CATARACT	114
Term congenital explained	114
Not usually observed at first	114
Depend on defective nutrition	115
