### PREFACE

THE student of Organic Chemistry will probably be impressed at an early stage with the importance of metallic sodium and its compounds in synthetic work, and will subsequently mark the value of such substances as acetoacetic-, malonic-, and cyanaceticester and their sodium compounds.

He will notice the use of aluminium chloride in the preparation of various aromatic compounds, will hear the story of the discovery of the zinc alkyls, and will possibly be attracted by those interesting bodies, the organo-metals.

Various metals and metallic derivatives have been utilised in the development of Organic Chemistry, and during recent years, much attention has been given to the use of magnesium in the Grignard reaction and to the value of the carbides in the fixation of atmospheric nitrogen, while the reduction and synthesis of organic compounds in the presence of reduced nickel and other metals has, by development, led to the discovery of numerous catalytic changes in the presence of certain metallic oxides.

In this volume an attempt has been made to present an account of the uses to which the metals and certain of their compounds have been put, and the work is based upon a course of lectures, on this subject, recently given by the author to the advanced students of Finsbury Technical College.

Each chapter is supplemented by an appendix of practical work exemplifying the methods mentioned in the text.

Most of the preparations have been carried out in the College laboratories, and in connection with this part of the work the author desires to acknowledge the valuable assistance of two advanced students, Messrs. T. McLachlan and E. Mendoza. He is also indebted to Mr. F. W. Streatfeild, F.I.C., Senior Demonstrator, for help during the reading of the proofs.

A. J. H.

LONDON; February, 1914.

# CONTENTS

### CHAPTER I.

SODIUM AND POTASSIUM.	12162
Synthetic Use of the Metals—Sodium ethylate—Sodamide —Sodium hydroxide—Potassium cyanide—Potassium bisulphate—Potassium hydroxide—Potassium nitrate —Potassium and sodium disulphates	1
CHAPTER II.	
COPPER AND STATE,	
Use of the Metals—Copper acetylene derivatives—Silver cyanide—Silver hydroxide	36
CHAPTER III.	
MAGNESIUM, CALCIUM AND BARIUM.	
Applications of the Grignard reagent—Carbides of Calcium and Barium—Nitrogen fixation—Calcium and Mag- nesium nitrides—Hydroxides of the metals	42
CHAPTER IV.	
ZUNC AND MERGURY.	
Metallic Zinc—Zinc chloride — Mercuric oxide — Metallic mercury	64

#### CHAPTER V.

ALUMINIUM, TIN AND LEAD.	
Aluminium chloride—Aluminium-mercury couple—Tin and lead organo-metallic compounds—Tin tetrachloride— Lead oxide—Antimony and the chlorides of antimony—	PAGE
Vanadium pentoxide	77
CHAPTER VL	
IRON, NICKEL AND PLATINUM.	
Ferrous sulphate—Ferrous potassium oxalate—Iron and ferric chloride—Reduction by reduced iron, nickel or	ia.
cobalt	88
APPENDIX L	
PRACTICAL WORK: SODIUM POTASSIUM.	
Ethyl bensene—Anisole—Benzoic anhydride—Hexamethy- lene—Trimethylene dicarboxylic acid—Chloroformic ester—Carbonyl chloride—Ethyl benzoate—Toluic ethyl ester—Acetoacetic ester—Ethyl acetoacetic ethyl ester —Aceto-succinic ester—Ethyl malonic ester—Diaceto-succinic ester—Ethane tetra-carboxylic ester—Acetyl-acetoacetic ester—Antipyrine—Methyl succinic ester—Succino-succinic ester—Tin tetraphenyl —Lead tetraphenyl—Mercury diphenyl—Silicon tetra- phenyl—Oxalyl-acetic ester—Hydroxy-methylene cam- phor—Acetyl-acetophenone—Ethyl acetophenone—Fur- furol acrolein—Cinnamyl-vinyl-methyl ketone—Acetic anhydride—Benzoin—Desyl-acetophenone—Phenan- throxylene-acetoacetic ester	104
APPENDIX II.	
PRACTICAL WORE: COPPER-SILVER,	
Acrolein—Acrylic scid—\$\beta\$-Iodopropionic scid—Adipic scid  —Carbazole—o-Nitrophenyl-propiolic scid—Di-o-nitro- phenyl-discetylene—o-Chlor-toluene—o-Chlor-benzoic scid—p-Chlor-toluene—Formaldehyde	128

#### CONTENTS

- 4		and the law	-	 -	-
	313	EΝ	т.	п	

ALIENDIA III.	
PRACTICAL WORE: MAGNESIUM-CALCIUM.	
Benzoic acid—Phenyl-ethyl-carbinol—Trimethyl carbinol— Triphenyl carbinol—Camphoric anhydride—Homo-cam- phoric acid—Camphor—Pentamethylene—Cyanamide .	187
APPENDIX IV.	
PRACTICAL WORK: ZING-MERCURY.	
Citric acid—Use of Zinc alkyl iodide—Naphthalene—Iso- quinoline—Fluorescein—Malachite green—Acridine— a-Methyl-indole—Propyl chloride—a-Ethoxy-quinoline —Phthalic acid	144
APPENDIX V. PRACTICAL WORK: ALUMINIUM—TIM—LEAD.	
Dimethyl-aniline-phosphor-chloride — p-Toluic-aldehyde — Diphenyl-methane—a-Hydrindone—Triphenyl-methane —Acetophenone—o-Benzoyl-benzoia acid—Anthraqui- none—Hydrolysis of anisole—Toluene—Diphenyl—	153
APPENDIX VI.	
PRACTICAL WORK; IRON-NICKEL.	
o-Amino-benzaldehyde — o-Amino-cinnamic acid — Mannose —Hexahydrobenzene—Hexahydrophenol	162
INDEX	167
