	PAGE
INTRODUCTION	1
CHAPTER I.	
DEPRECIATION.	
Definition of depreciation	9
Causes of fall in exchangeable value	9
The term "Profits, increase, or other advantage"	10
Depreciation is unaffected by market fluctuations in value	10
Market fluctuations must be entirely disregarded	11✓
Stock Exchange securities and the like are not wasting assets... ..	11
The word "depreciation" has too wide a meaning	12
The term "Expired capital outlay" is an exact definition of "depreciation" in its commercial sense	12
Questions raised by legal writers	13
Answers to these questions	14
CHAPTER II.	
WASTING ASSETS.	
Definition of wasting assets	15
Materials held for manufacture and sale are not wasting assets, neither are Stock Exchange securities	16
Inherently wasting assets	16
Wasting assets always waste while applied to the purpose of seeking profits	17
CHAPTER III.	
FIXED AND FLOATING CAPITAL.	
Distinction between amount of capital embarked and state of capital investment	18
Capital can exist only in exchangeable value	18
Capital outlay is only long-period revenue outlay	19
Constant interchange between fixed and floating capital	20
Capital released from wasting assets may be otherwise laid out	20
Reduction of wasting assets is not reduction of capital... ..	21

250397

	PAGE
Illustration of interchange between fixed and floating capital	21
Present neglect to account for capital invested in wasting assets	28
And consequent impossibility of reasoned judgment on financial position of an undertaking	29
Co-operation needed between Engineers and Accountants	29
Present haphazard methods should be superseded	30

CHAPTER IV.

ECONOMIC COST.

Definition of economic cost	31
Factors of economic cost	31
Economic cost is value consumed in producing value	32
Neglect of present accounting for past unexpired capital outlay	32
Depreciation is as much part of economic cost as are wages paid	33
Views of Economists	33
Illustration of economic cost	34
Difficulty in computing periodic economic cost yearly	34
Neglect to refund expired capital outlay out of annual revenue receipts	35
Over-statement of annual profits	36
Consequent shortage of actual capital	36
And inflation of share capital	37
Obscurity of financial position	37
Need of regular accounting for capital outlay	38
The advantage of this compared with its cost	39
Payment of company dividends is not always limited by law to amount of profits	39
Legal decision, "Lee v. Neuchatel"	40
Legal decision, "Lambert v. Neuchatel Asphalte Co."	40
Legal dicta	41
Legal doctrine protects commercial practice	41
Directors are bound to make proper investigation	42

CHAPTER V.

THE INTEREST QUESTION.

Interest question deserves careful attention	43
Nature of interest	43
Importance of interest periods or rests	43
Definition of interest. Commercial compound interest	44
Proper use of interest...	45
Annuity method of computing depreciation	45
Illustration of annuity method	46
Sinking fund method of computing depreciation	47

CONTENTS.

vii

	PAGE
Illustration of sinking fund method	48
Comparison between annuity and sinking fund methods ...	49
Effect of charging unexpired capital outlay with interest ...	50
Illustration of this effect	50
In commercial accounting interest should not be charged on capital locked up in wasting assets	53
But interest is an important factor in computing cost of production	53
Diminution in capital locked up in industrial plant does not diminish the extent or efficiency of the plant	54
Use of annuity and sinking fund methods by municipalities ...	55
Computation of annual cost in a terminating undertaking ...	56
Interest should, in such cases, be charged on average capital ...	57
Illustration of method of arriving at average capital	58
Short method of arriving at average capital	60
Use of interest in dealing with cost of leasehold premises ...	61
Summary of conclusions	62
Further arguments against the use of interest or discount in commercial accounting, unless actually payable, or actually receivable	63

CHAPTER VI.

INDUSTRIAL PLANT. MEASUREMENT OF DEPRECIATION.

Industrial plant the largest division of wasting assets	67
Extent of capital outlay on industrial plant	68
Investment therein is nothing more than payments in advance on revenue account	69
Outlay on industrial plant compared with other advance payments	69
Agreement between capital outlay account in financial books and register of industrial plant	69
Expiration of <i>time</i> is the proper basis for measuring depreciation	71
Cost, less scrap value, should be distributed to revenue equally over each year of the whole-life period	73
This secures a regular annual charge coinciding, roughly, with value consumed each year	73
Employment of money set aside	74
Increase in cost of repairs in later years	74
The use of existing industrial plant cannot be deferred with impunity	75
Treatment should be similar whether life be one or more years	76
Depreciation provision is not for future renewals, but for past capital outlay expired	76
Depreciation is fall in exchangeable value over whole period of use, and is unaffected by fluctuations in market prices...	77

	PAGE
Principal difficulty arises from need of making provision year by year during period of use	77
And suitable accounting equipment is required for this ...	78
Annuity and sinking fund methods are unsuitable	79
Original cost basis is most suitable	79
Industrial plant must be capable of efficient work during efficient life	80
Proportion in which whole output is receivable period by period	80
✓ Reducing balance of cost basis is unsuitable and misleading ...	81
Reducing balance of cost basis takes excessive time at ordinary rates	82
Rates needed to operate within the limits of ordinary life periods	83
Effect of employing reducing balance of cost basis at ordinary rates	83
Illustration of reducing balance of cost basis	84
✓ Disadvantages of reducing balance of cost basis... ..	86
Simple <i>versus</i> complicated methods of measuring depreciation	86
Financial evils encouraged by present neglect of the subject ...	87
Suggested statutory register of plant for the measurement of depreciation	90
✓ Check upon doubtful methods	91
Responsibility for declaration of economic life period	91
Register does not involve liability upon Directors	92
Register might be compulsory on new undertakings only ...	92
Present methods may be improved... ..	93
French company law makes compulsory some annual provision	94
Proposed statutory register is a great advance on present methods	95

CHAPTER VII.

INDUSTRIAL PLANT. RECORD OF DEPRECIATION.

Annual revenue account should not be charged with cost of new plant or renewals, but should be charged with measured depreciation	96
Difficulty of distinguishing between additions and renewals	97
Proposed register of plant obviates this difficulty	98
Use of official schedule of capital outlay to avoid danger of charging cost of small renewals and repairs to capital expenditure	98
Treatment of scrapped or abandoned industrial plant	99
Loose tools and utensils	99
Convenient form for register of plant	100
Register will show many years' history of hundreds of classes of industrial plant	101
Measurement of depreciation each month if desired	102
Division of industrial plant into classes... ..	102
Identification of plant by distinctive numbers... ..	103

CONTENTS.

ix

	PAGE
Working illustration of register of industrial plant ...	103
Electric tramway undertaking	104
Annual outlay compared with annual depreciation ...	105
Reason for difference in annual depreciation in illustration ...	106
Class record in register of industrial plant	106
Class summary in register of industrial plant	108
Annual general summary in register of industrial plant ...	109
Further illustration of register of industrial plant ...	113
Particulars of illustration	114
Class record	116
Class summary and annual general summary	118
In the case of an established undertaking	118
Method of registering outlay and measuring depreciation ...	119
Initial difficulty in the case of an established undertaking ...	120
Class record for meters of a gas company... ..	121
Need of back years' records	123
Apparent difficulty in the case of some established undertakings	125
Method of revising estimates of life periods and scrap values... 126	126
Illustration of this method	126
Simplicity of method	131
Use of remainders in building new plant	131
Accidental destruction of plant	132
Outlay on plant at intervals during life period	132
Treatment of proceeds of sales of scrap	132
Adaptable nature of register	133
Explanations and illustrations are incomplete	135

CHAPTER VIII.

NATURAL RAW MATERIAL AND RECURRING CROPS.

Description of wasting assets under this head	136
Extent of capital outlay on natural raw material and recurring crops	136
All are payments made in advance on revenue account... ..	137
Depreciation and natural raw material	138
Depreciation and recurring crops	138
Depreciation factors to be considered	139
Depreciation and collieries, mines, &c.	140
Wasting assets dealt with in this chapter all come to an end in yielding their product	141
Inconvenience of repaying capital in the form of ordinary dividends	141
A remedy for concealed reduction of capital, and an example	142
Illustrations of proposed remedy	143
Present "case" law allows concealed reduction of capital ...	144
Depreciation and mine development	144
Accounting equipment for recording depreciation	144

CHAPTER IX.

PURCHASED TERMINABLE ANNUITIES.

	PAGE
Nature of purchased terminable annuities	146
Loans repayable with interest in equal annual payments ...	146
Illustration of annuity certain	146
Illustration of life annuity	147
Factors in annuity can be easily separated	148
Interest factor diminishes annually	149

CHAPTER X.

PURCHASED TERMINABLE CONCESSIONS. LEASEHOLDS.

Inherently wasting assets, and other wasting assets	150
Value of concessions and leaseholds consists of rights to future pure profit	151
Purchased terminable concessions	151
Consideration is future pure profit paid in advance of its arising	152
Illustration of purchased terminable concession	152
Annual provision for expired capital outlay	152
Nature of consideration	153
Capital, when the consideration is deferred	153
Capital, when the consideration has been paid in cash	154
Liquidation of capital, when the consideration is deferred ...	154
Liquidation of capital, when the consideration has been paid in cash	155
Difference in the financial results when consideration deferred and when payable in cash	156
Legal facilities needed to enable surplus capital to be repaid to shareholders	157
Leaseholds	158
Repairs and maintenance at cost of lessee	158
Repairs and maintenance at cost of lessor	159
Importance of distinction between the two kinds of wasting assets	159

CHAPTER XI.

COPYRIGHTS. PATENT RIGHTS. GOODWILL. TRADE MARKS.

Characteristics common to these wasting assets	161
Nature of their exchangeable value	161
Expected future surplus profits	162
Provision for expired capital outlay	162
Copyrights	163
