EDWARD S. DANA & WILLIAM E. FORD

**SECOND APPENDIX TO
THE SIXTH
EDITION OF DANA'S
SYSTEM OF MINERALOGY**

DANA'S SERIES OF MINERALOGIES.

New "System of Mineralogy."

Embodying the results of the last twenty-four years of active progress. Containing more than half more matter than the former edition, and the page increased one-fifth in size. Not merely revised but entirely rewritten. Sixth edition, 1892. With Appendices I and II, completing the work to 1909..... \$12.50

First Appendix to the Sixth Edition of Dana's System of Mineralogy.

Completing the work to 1899..... Cloth, \$1.00

Second Appendix to the Sixth Edition of Dana's System of Mineralogy.

Completing the work to 1909..... Cloth, \$1.50

Manual of Mineralogy and Petrography.

Containing the Elements of the Science of Minerals and Rocks, for the use of the Practical Mineralogist and Geologist, and for Instruction in Schools and Colleges. By the late Jas. D. Dana, LL.D. Twelfth edition. Illustrated with numerous woodcuts..... 12mo, cloth, \$3.00

A Text-book of Mineralogy.

With an Extended Treatise on Crystallography and Physical Mineralogy. By Edward Salsbury Dana, Professor of Physics and Curator of Mineralogy, Yale University. New edition, entirely rewritten and reset. With nearly 1000 figures and a colored plate..... 8vo, cloth, \$4.00

Minerals, and How to Study Them.

A book for beginners in Mineralogy. By Prof. E. S. Dana.
12mo, cloth, \$1.50

ALSO

A Text-book of Elementary Mechanics.

For the use of Colleges and Schools. By Prof. E. S. Dana.
12mo, cloth, \$1.50

SECOND APPENDIX
TO THE
SIXTH EDITION
OF
DANA'S SYSTEM OF MINERALOGY

BY
EDWARD S. DANA
PROFESSOR OF PHYSICS AND CURATOR OF MINERALOGY, YALE UNIVERSITY
AND
WILLIAM E. FORD
ASSISTANT PROFESSOR OF MINERALOGY, SHEFFIELD SCIENTIFIC SCHOOL OF
YALE UNIVERSITY

COMPLETING THE WORK TO 1909

NEW YORK
JOHN WILEY & SONS
LONDON: CHAPMAN & HALL, LIMITED

1909

PREFATORY NOTE

This Second Appendix to the Sixth Edition of the System of Mineralogy issued in 1892 is designed to make the work complete up to the beginning of 1909. Its preparation was begun by the Senior Editor soon after the publication of the First Appendix in 1899, and carried forward at intervals down to 1906, when he was finally compelled to relinquish it. The work was resumed by the Junior Editor in 1907 and carried through to completion.

During the ten years of mineralogical investigation which this appendix covers, a large amount of material has been published. An evidence of this is to be found in the two hundred new names which are given in the classified list in the Introduction. About sixty of these new names on account of the completeness of their descriptions seem to have a warrant for their acceptance as new species. The other names are either of imperfectly described minerals or variety names of well-recognized species.

The descriptions of the new species included in this book are given concisely but completely. It was found, however, impracticable to follow the plan adopted in the System and the First Appendix of recalculating all the angles and crystal constants of the new species. This has been done in a few cases, but in the majority of the descriptions the figures of the authors have been accepted without verification. In the cases of some of the new species with complex crystals it has been impossible to give the complete lists of the forms identified upon them. The method followed has been to give the more common and prominent forms and to indicate the number of those not listed.

For an explanation of the *Abbreviations* made use of in the case of periodicals, also of the crystallographical, optical and chemical symbols employed, reference is made to the Introduction to the System (1892), pp. xlvi-li and pp. xiii-xl. General abbreviations are explained on pp. lxi-lxii.

The bibliography, while not intended to be exhaustive, contains, it is thought, the titles of all the important volumes published between 1899 and 1909.

CLASSIFIED LIST OF NEW NAMES.

I. NATIVE ELEMENTS, Min. pp. 2-32.

- Arsensulfurite (p. 9). Var. Sulphur, Min. p. 8.
Quisqueite (p. 87). Chiefly C and S.
Souselite (p. 11). Nickel-iron alloy, near Awaruite, Min. p. 29.

II. SULPHIDES, TELLURIDES, ARSENIDES, ETC., Min. pp. 33-108.

- ARSENSCHWEFEL (p. 9), $\text{As}_2\text{S}_3 + \text{H}_2\text{O}$.
PATRONITE (p. 79), VS_3 (?).
Keweenawite (p. 59), $(\text{Cu},\text{Ni},\text{CO})_2\text{As}$.
Stibiodomeyrite (p. 97). Var. of Domeyite, Min. p. 44.
MOHAWKITE (p. 70), $(\text{Cu},\text{Ni},\text{CO})_2\text{As}$.
LEDOUXITE (p. 62), Cu_4As .
Rickardite (p. 89), Sanfordite (p. 90), Cu_4Te_2 .
KALGOORLITE (p. 58), $\text{HgAu}_2\text{Ag}_2\text{Te}_2$.
Coolgardite (p. 31). Telluride of Au, Ag, Hg. Probably a mixture.
Chalmersite (p. 27), $\text{Cu}_2\text{Fe}_2\text{S}_3$. Near Chalcoelite, Min. p. 55.
Teallite (p. 104), PbS_2SnS_2 .
Bravoite (p. 19). Nickeliferous Pyrite, Min. p. 84.
BADENITE (p. 12), $(\text{Co},\text{Ni},\text{Fe})_2(\text{As},\text{Bi})_2$.
Speculite (p. 95). A silver, gold telluride near Sylvanite, Min. p. 103.
VON DIESTITE (p. 110). Telluride of silver and bismuth.

III. SULPHO-SALTS, Min. pp. 109-151.

- HISTRIXITE (p. 52), $7\text{Bi}_2\text{S}_2\text{Sb}_2\text{S}_4\text{S}5\text{CuFeS}_2$.
Hutchinsonite (p. 53), $(\text{Ti},\text{Ag},\text{Cu})_2\text{S}_2\text{As}_2\text{S}_3 + \text{PbS}_2\text{As}_2\text{S}_3$ (?).
Treichmannite (p. 107), $\text{Ag}_2\text{S}_2\text{As}_2\text{S}_3$, rhombohedral.
Smithite (p. 95), $\text{Ag}_2\text{S}_2\text{As}_2\text{S}_3$, monoclinic.
Liveingite (p. 64), $5\text{PbS}_2\text{As}_2\text{S}_3$.
Baumhauerite (p. 13), $4\text{PbS}_2\text{As}_2\text{S}_3$.
SELIGMANNITE (p. 92), $\text{Cu}_2\text{S}_2\text{PbS}_2\text{As}_2\text{S}_3$ (?) Near Bouronite, Min. p. 126.
LENGENBACHITE (p. 62), $6\text{PbS}_2(\text{Ag},\text{Cu})_2\text{S}_2\text{As}_2\text{S}_3$ (?)
Antimon-Luzonite (p. 7). Var. Enargite, Min. p. 147.
Sulanite (p. 101), $3\text{Cu}_2\text{S}_2\text{V}_2\text{S}_3$.

IV. CHLORIDES, BROMIDES, IODIDES, Min. pp. 152-182.

1. ANHYDROUS CHLORIDES, ETC.

- Kleinite** (p. 59). Mercury ammonium chloride.
Chlormatokalite (p. 28). A mixture of Halite, Min. p. 154, and Sylvite, Min. p. 156.
Chlormanganokalite (p. 28), $4\text{KCl}\cdot\text{MnCl}_2$.
Chloragryrite (p. 28). Same as Cerargyrite, Min. p. 158.
